The Journal of Continuing Education in the Health Professions

Volume 29, 2009

Subject Index

ACCME Annual Report, 82
ACCME Standards for Commercial Support, 69
Accreditation: ACCME standards for, 2, 68, 76; ACGME toolbox for, 12; AMA/PRA Category 1 Credit system of, 198, 199, 242, 243; using commercially supported CME/CPD for, 68–70; European CME/CPD, 59–61; Spanish Accreditation Council for CME (SACCME), 60; U.S. Food and Drug Administration for CME, 68, 69
Accreditation Council for CME (ACCME): CME costs/benefits analysis by, 134; CME regulation role of, 197–199, 242, 243; CME which is not accredited by, 68; commercial support of sponsors of the, 81–82; continuing education course as defined by, 81; fee structure for state accreditors by, 197; revised accreditation standards of, 2; six competencies framework used by, 194, 222; standards related to bias/patient-care recommendations by, 76
Accreditation Council for Graduate Medical Education (ACGME): Outcomes Project of, 105–109; professionalism as described by, 105; six competencies identified by, 194, 222; toolbox of, 12
Adapted Fresno Test (AFT): Fresno Test for testing competence, 119–120; testing competence using, 120–125
AMA/PRA Category 1 Credit system, 198, 199
American Academy of Family Physicians (AAFP), 42, 223
American Board of Internal Medicine (ABIM), 209, 210, 212
American Board of Medical Specialties (ABMS), 3, 186, 194, 197, 221
American College of Obstetrics and Gynecology (ACOG), 223
American College of Physicians (ACP), 209, 223
American Council of Graduate Medical Education, 186
American Epilepsy Society (AES), 242
American Medical Association (AMA): assessing costs/benefits of CME, 134; Category 1 Credit designated by, 198, 199, 242, 243; CME costs/benefits report made to, 197; Internet point of care (PoC) learning introduced by, 39–42, 210–215, 276. *See also* United States
American Medical Association House of Delegates, 197, 198, 199
ASR NVivo software, 53
Assessment: of bias in CME, 76; CIME Study and high-risk patient, 18–19, 31; CME learning outcomes framework for, 2–13; of continuing interprofessional education (CIPE), 168–171; formative learning outcome, 10; learning needs, 11; of learning outcomes throughout process, 10–12; need for physician, 220–232; patient health status, 11; peer review of CME-accredited presentations, 242–245; physician competence, 3, 12, 169, 194, 220–232; physician performance, 11; SAPs (self-assessment programs), 190–191; summative learning outcome, 10. *See also* Evaluation
Assessment tools: Adapted Fresno Test (AFT), 120–125; ASR NVivo software, 53; Cochrane Collaboration tool for risk of bias, 48, 49; Evaluation of Resident Performance Form, 110; Fresno Test, 119–120; Healthcare Monitor survey, 261–267; Internet-based clinical-question portfolio, 209–215; Interview Guide for Physician Assessment Study, 233–234; ITOSCE (interprofessional team objective structured clinical examination), 170; Miller's competence pyramid, 3, 169; multisource feedback systems for OT assessments, 111–117; OSCE (objective structured clinical examination), 170; Point-of-Care Report, 216–219; 360-degree feedback from nurses on residents, 105–110; TOSCE (Team-OSCE) simulation, 170
Association of American Medical Colleges (AAMC), 35, 197
Australia: Commonwealth Department of Health and Ageing, 56; community pharmacy online CME course in, 52–56; Community Pharmacy Research Support Centre of, 56; Flinders University Social and Behavioral Research Ethics Committee in, 53; Monash Standing Committee on Ethics in Research of, 53; National Prescribing Service (NPS) of, 54
Australian Consultant Pharmacy Web site, 53

Behavior theories, 179
Bias: assessment of CME, 76; Cochrane Collaboration tool for risk of, 48, 49
Board Action Data Bank (BAD), 221. *See also* FSMB BAD analysis
Book reviews: *Critical Thinking: An Exploration of Theory and Practice* (Moon), 80; *Designing and Constructing Instruments for Social Research and Evaluation* (Covert), 132; *How to Teach Continuing Medical Education* (Davis), 79; *Practical Guide to the Evaluation of Clinical Competence* (Holmboe and Hawkins), 194–195
British continuing medical education (CME), 59–61

Canada: Canadian Institutes of Health Research (CIHR), 155; CIME Study of cardiovascular patients in, 17–28; College of Family Practice of Canada (CFPC) of, 63; Regulated Health Professions Act (RHPA) of, 110; Royal College of Physicians and Surgeons of Canada (RCPSC), 190–191, 214; study on drivers of CME in family medicine in, 63–67
Canadian Institutes of Health Research (CIHR), 155
Cardiovascular (CV) patients: CIME Study of, 17–28; clinical practice guidelines (CPG) developed for, 16–28; risk factors of, 16
Cardiovascular (CV) prevention: CIME Study on developing guidelines for, 17–28, 30–31; past approaches to, 16–17
Cedars Sinai Medical Center: ACGME accredited residency program of, 106; 360-degree evaluation of residents by nurses, 106–110
Centre for the Advancement of Interprofessional Education (CAIPE), 161
Chambers, A., 84–88
Charter of Medical Professionalism, 185
CIME Study: cardiovascular (CV) prevention guidelines objective of, 17; characteristics of physicians participating in, 22; CPGs (clinical practice guidelines) developed during, 17–26; discussion of, 23–25; intervention tools used in the, 30–31; limitations of, 25–27; methods used during, 17–20; patients participating in the, 18–19, 23–25; PER (practice enablers and reinforcers) group of, 17, 19, 24–25, 27; results of the, 20–23
CINAHL database, 45
College of Family Practice of Canada (CFPC), 63
College of Medical Radiation Technologists (Ontario), 112
College of Occupational Therapists of Ontario, 112
Columbia University Stroud Center, 158
Commercially supported CME: assessing value to commercial supporters, 68–69; examining foundations and future of, 71–75; examining politics of U.S., 81–83; funding mechanisms of, 73–74; value to CME/CPD leadership, 70; value to physicians and society, 69–70. *See also* Continuing medical education (CME)
Commonwealth Department of Health and Ageing (Australia), 56
Communities of practice, 181–182
Community pharmacists: dyslipidemia patients' collaborative care by physicians and, 201–207; online CME for Australian, 52–56
Community pharmacists (Australia): Australian Consultant Pharmacy Web site resource for, 53; Home Medication Reviews (HMRs) given to, 53; services provided by, 52; study on effectiveness of online CME for, 52–56; traditional continuing education for, 52–53
Community Pharmacy Research Support Centre (Australia), 56
Complexity theory, 179–180
Computerized Obstetrics and Gynecology Automated Learning Analysis (KOALA), 214
Connecticut State Medical Society, 42
Consortium of New York Education Centers, 159
Constructivist knowledge, 163
Continuing Education and Professional Development (University of Toronto), 34–35

ACCME Annual Report, 82
ACCME Standards for Commercial Support, 69
Accreditation: ACCME standards for, 2, 68, 76; ACGME toolbox for, 12; AMA/PRA Category 1 Credit system of, 198, 199, 242, 243; using commercially supported CME/CPD for, 68–70; European CME/CPD, 59–61; Spanish Accreditation Council for CME (SACCME), 60; U.S. Food and Drug Administration for CME, 68, 69
Accreditation Council for CME (ACCME): CME costs/benefits analysis by, 134; CME regulation role of, 197–199, 242, 243; CME which is not accredited by, 68; commercial support of sponsors of the, 81–82; continuing education course as defined by, 81; fee structure for state accreditors by, 197; revised accreditation standards of, 2; six competencies framework used by, 194, 222; standards related to bias/patient-care recommendations by, 76
Accreditation Council for Graduate Medical Education (ACGME): Outcomes Project of, 105–109; professionalism as described by, 105; six competencies identified by, 194, 222; toolbox of, 12
Adapted Fresno Test (AFT): Fresno Test for testing competence, 119–120; testing competence using, 120–125
AMA/PRA Category 1 Credit system, 198, 199
American Academy of Family Physicians (AAFP), 42, 223
American Board of Internal Medicine (ABIM), 209, 210, 212
American Board of Medical Specialties (ABMS), 3, 186, 194, 197, 221
American College of Obstetrics and Gynecology (ACOG), 223
American College of Physicians (ACP), 209, 223
American Council of Graduate Medical Education, 186
American Epilepsy Society (AES), 242
American Medical Association (AMA): assessing costs/benefits of CME, 134; Category 1 Credit designated by, 198, 199, 242, 243; CME costs/benefits report made to, 197; Internet point of care (PoC) learning introduced by, 39–42, 210–215, 276. *See also* United States
American Medical Association House of Delegates, 197, 198, 199
ASR NVivo software, 53
Assessment: of bias in CME, 76; CIME Study and high-risk patient, 18–19, 31; CME learning outcomes framework for, 2–13; of continuing interprofessional education (CIPE), 168–171; formative learning outcome, 10; learning needs, 11; of learning outcomes throughout process, 10–12; need for physician, 220–232; patient health status, 11; peer review of CME-accredited presentations, 242–245; physician competence, 3, 12, 169, 194, 220–232; physician performance, 11; SAPs (self-assessment programs), 190–191; summative learning outcome, 10. *See also* Evaluation
Assessment tools: Adapted Fresno Test (AFT), 120–125; ASR NVivo software, 53; Cochrane Collaboration tool for risk of bias, 48, 49; Evaluation of Resident Performance Form, 110; Fresno Test, 119–120; Healthcare Monitor survey, 261–267; Internet-based clinical-question portfolio, 209–215; Interview Guide for Physician Assessment Study, 233–234; ITOSCE (interprofessional team objective structured clinical examination), 170; Miller's competence pyramid, 3, 169; multisource feedback systems for OT assessments, 111–117; OSCE (objective structured clinical examination), 170; Point-of-Care Report, 216–219; 360-degree feedback from nurses on residents, 105–110; TOSCE (Team-OSCE) simulation, 170
Association of American Medical Colleges (AAMC), 35, 197
Australia: Commonwealth Department of Health and Ageing, 56; community pharmacy online CME course in, 52–56; Community Pharmacy Research Support Centre of, 56; Flinders University Social and Behavioral Research Ethics Committee in, 53; Monash Standing Committee on Ethics in Research of, 53; National Prescribing Service (NPS) of, 54
Australian Consultant Pharmacy Web site, 53

Behavior theories, 179
Bias: assessment of CME, 76; Cochrane Collaboration tool for risk of, 48, 49
Board Action Data Bank (BAD), 221. *See also* FSMB BAD analysis
Book reviews: *Critical Thinking: An Exploration of Theory and Practice* (Moon), 80; *Designing and Constructing Instruments for Social Research and Evaluation* (Covert), 132; *How to Teach Continuing Medical Education* (Davis), 79; *Practical Guide to the Evaluation of Clinical Competence* (Holmboe and Hawkins), 194–195
British continuing medical education (CME), 59–61

Canada: Canadian Institutes of Health Research (CIHR), 155; CIME Study of cardiovascular patients in, 17–28; College of Family Practice of Canada (CFPC) of, 63; Regulated Health Professions Act (RHPA) of, 110; Royal College of Physicians and Surgeons of Canada (RCPSC), 190–191, 214; study on drivers of CME in family medicine in, 63–67
Canadian Institutes of Health Research (CIHR), 155
Cardiovascular (CV) patients: CIME Study of, 17–28; clinical practice guidelines (CPG) developed for, 16–28; risk factors of, 16
Cardiovascular (CV) prevention: CIME Study on developing guidelines for, 17–28, 30–31; past approaches to, 16–17
Cedars Sinai Medical Center: ACGME accredited residency program of, 106; 360-degree evaluation of residents by nurses, 106–110
Centre for the Advancement of Interprofessional Education (CAIPE), 161
Chambers, A., 84–88
Charter of Medical Professionalism, 185
CIME Study: cardiovascular (CV) prevention guidelines objective of, 17; characteristics of physicians participating in, 22; CPGs (clinical practice guidelines) developed during, 17–26; discussion of, 23–25; intervention tools used in the, 30–31; limitations of, 25–27; methods used during, 17–20; patients participating in the, 18–19, 23–25; PER (practice enablers and reinforcers) group of, 17, 19, 24–25, 27; results of the, 20–23
CINAHL database, 45
College of Family Practice of Canada (CFPC), 63
College of Medical Radiation Technologists (Ontario), 112
College of Occupational Therapists of Ontario, 112
Columbia University Stroud Center, 158
Commercially supported CME: assessing value to commercial supporters, 68–69; examining foundations and future of, 71–75; examining politics of U.S., 81–83; funding mechanisms of, 73–74; value to CME/CPD leadership, 70; value to physicians and society, 69–70. *See also* Continuing medical education (CME)
Commonwealth Department of Health and Ageing (Australia), 56
Communities of practice, 181–182
Community pharmacists: dyslipidemia patients' collaborative care by physicians and, 201–207; online CME for Australian, 52–56
Community pharmacists (Australia): Australian Consultant Pharmacy Web site resource for, 53; Home Medication Reviews (HMRs) given to, 53; services provided by, 52; study on effectiveness of online CME for, 52–56; traditional continuing education for, 52–53
Community Pharmacy Research Support Centre (Australia), 56
Complexity theory, 179–180
Computerized Obstetrics and Gynecology Automated Learning Analysis (KOALA), 214
Connecticut State Medical Society, 42
Consortium of New York Education Centers, 159
Constructivist knowledge, 163
Continuing Education and Professional Development (University of Toronto), 34–35

© 2009 Wiley Periodicals, Inc.

Continuing interprofessional education (CIPE): assessment of, 168–171; description of, 142–145; examining different medium used for, 149; faculty development for, 144, 172–176; future of, 145, 150; in geriatrics and gerontology in medically underserved areas, 157–160; incorporated into other teaching methodologies, 148; recent trends in, 143–145; selecting between approaches of, 147; within surgical training, 185–188; team approach of, 148–149; transition from multiprofessional to, 148. *See also* Interprofessional education (IPE)
Continuing medical education (CME): ACCME fee structure of, 197; assessment of bias in, 76; cardiovascular clinical practice guidelines developed by, 16–28; costs and benefits of, 133–140, 197–199; drivers of family physician, 63–67; EBP (evidence-based practice) and Fresno Test used in, 119–125; evaluating scholarship for faculty and staff of, 32–36; expanding outcomes framework for planning and assessing, 2–13; five case examples of European, 58–62; French hospital physicians participation in, 127–131; to improve patient outcomes, 84–88; improving teaching of physical diagnosis in, 77–78; Internet point of care (PoC) approach to, 39–42, 276; interrater reliability to assure valid content in peer review of, 242–245; MOSES for promoting patient safety in obstetrics, 98–103; move to regulate costs of U.S., 197–199; Nigerian MDCN workshops for, 255–258; personal learning projects/self-directed learning in, 91–96; physician continuing education concerns of, 2; problems with inadequate, 3. *See also* Accreditation Council for CME (ACCME); Commercially supported CME; Medical education; Online CME courses; Physicians
Continuing medical education (CME) outcomes framework: comparing expanded with original, 3; examining conceptual, 2–6; expanding assessing and planning, 2; Miller's adapted clinical assessment, 3; practical applications for planning learning activities, 6–10
Continuing professional development (CPD): examining European practices of, 59–61; examining the value of commercially supported, 68–70; redefining self-assessment component of, 190
Cooperative learning, 162, 163
Cost analysis: definition of, 133; Healthcare Monitor survey, 263–264
Cost-benefit analysis: of continuing medical education, 134, 197–199; definition of, 133; of free online CME for IPV (intimate partner violence), 135–140
Cost-effectiveness analysis: of continuing medical education, 134; definition of, 133; of free online CME for IPV (intimate partner violence), 135–140
Council on Accreditation of Continuing Medical Education (CACME), 197
Council of Medical Specialty Societies (CMSS), 223
Critical Thinking: An Exploration of Theory and Practice (Moon), 80

Dalhousie University, 64
Designing and Constructing Instruments for Social Research and Evaluation (Covert), 132
Diffusions of Innovation Theory (DoI), 251
Distance learning. *See* Online CME courses
Distributing learning, 161
Dixon's 4 levels of evaluation, 33
Domestic violence. *See* Intimate partner violence (IPV)
Dyslipidemia patient care, 201–207

E-CE (electronic continuing education) programs: description of, 44–45; discussion of study on, 49–50; limitations of study on, 50; literature search using online databases, 45; summary of study and findings on, 46–49
Education. *See* Continuing medical education (CME); Medical education
Educational Commission for Foreign Medical Graduates (ECFMG), 223
Electronic courses. *See* Online CME courses
EMBASE database, 45
European continuing medical education (CME): examining results in five countries, 59–61; history of, 58
Evaluation: Dixon's 4 levels of, 33; Evaluation of Resident Performance Form, 110; Kirkpatrick's 4 levels of, 33, 163. *See also* Assessment
Evidence-based practice (EBP) education: examining instruments measuring effect of, 119; Fresno Test of competence in, 119–125
Experiential learning, 162, 163

Face-to-face promotive interaction, 163
Faculty: comparing nurses' evaluation of residents to evaluations by, 108; composition of family physician CME, 65; development of CIPE, 144, 172–176; evaluating scholarship on CME, 32–36; improving teaching of physical diagnosis by, 77–78
Faculty development: challenges and issues related to, 175–176; conceptual framework for, 173; description of CIPE, 144, 172–173; planning curriculum for, 173–174; setting the stage for, 173; settings, formats, and teaching strategies for, 174–175; University of Toronto's IPE, 176
Family physicians (FPs): CME time spent by, 63; description of CME events attended by, 64; drivers of CME for, 63–67
Federation of State Medical Boards (FSMB), 2, 221–222, 223
Feedback systems: assessing OTs using multisource, 111–117; 360-degree feedback from nurses on residents, 105–110
Flinders University Social and Behavioral Research Ethics Committee (Australia), 53
Food and Drug Administration (FDA), 68, 69, 242
France: continuing medical education (CME) in, 59–61; participation of hospital physicians in CME, 127–131
Fresno Test: adapted version of, 120–125; EBP (evidence-based competence) and use of, 119; testing competence using, 119–120
FSMB BAD analysis, 221–232. *See also* Board Action Data Bank (BAD)
FSMB (Federation of State Medical Boards), 2, 221–222, 223

Gender issues: impacting behavior of Nigerian physicians, 257–258; Nigerian MDCN workshop guidelines on care and, 255–257
Geriatric Mental Health Teaching Day (2008), 160
Geriatrics continuing interprofessional education (CIPE), 157–160
Germany: ambulatory care physicians' perspectives on CME in, 259–267; CME (continuing medical education) in, 59–61; medical education in, 259–260, 261
Gerontology continuing interprofessional education (CIPE), 157–160
Grant Miller Cancer Research Grant (University of Toronto), 274

Health Canada, 161, 162
Health care improvement: description of high-quality care, 85–86; educational context for, 85; interprofessional education for, 85; opportunities for, 87–88; relationship between interprofessional learning and, 85–86; study on OTs and, 111–117; *To Err is Human* report on need for, 220; as underlying aim of CME, 84
Health care system: influence of gender and status in Nigeria, 254–258; RTNA network facilitating knowledge translation in, 192–193; understanding impact of networks on, 193
Health InterNetwork Access to Research Initiative (HINARI), 257
Health Research Transfer Network of Alberta (RTNA), 192–193
Healthcare Monitor survey: description of, 261; on German physicians' perspectives on CME, 261–267
Hippocratic Oath, 185
Home Medication Reviews (HMRs) [Australia], 53
Hospital for Sick Children (Toronto), 50
How to Teach Continuing Medical Education (Davis and Forrest), 79

Innovations: audience assessment of bias in CME, 76; improving teaching of physical diagnosis, 77–78; potential of networks in in facilitating knowledge translation, 192–193; SAPs (self-assessment programs), 190–191
Institute for Interprofessional Health Sciences Education (IIHSE/IEISS), 161–166
Institute of Medicine, 220
Institutional review boards (IRB), 73
Internet point of care (PoC): AMA's Category 1 credit through, 276; origins and development of, 39–40; study of Middlesex Hospital's use of, 40–42
Internet-based clinical-question portfolio, 209–215
Internet-based CME. *See* Online CME courses
Interprofessional collaboration (IPC): description of, 151; framework of, 154; future directions of, 153–155; systematic reviews of, 152–153
Interprofessional education (IPE): creating a culture of, 165–166; description and value of, 85, 151–152; as education context for improved patient outcomes, 85; health care improvement relationship to, 85–86; IIHSE/IEISS role in online, 161–166; improving clarity of interprofessional field and, 151–155; learning context for health care improvement, 86–87; MOSES for promoting patient safety in obsetrics, 98–103; opportunities and challenges of, 87–88; theories to aid understanding/implementation of, 178–183. *See also* Continuing interprofessional education (CIPE)

Interprofessional education theoretical perspectives: complexity theory, 179–180; reflective learning and learning from experience, 182; situated learning and communities of practice, 181–182; social identity, professionalism, and stereotyping, 180–181; social psychology, behavior, and learning theories, 179; transformative learning, 182
Interprofessional health sciences education, 161–166
Interprofessional team objective structured clinical examination (ITOSCE), 170
Interview Guide for Physician Assessment Study, 233–234
Intimate partner violence (IPV): expense of effective CME training for, 135–136; health problem of, 135; promoting free online CME on, 136–140
Italian continuing medical education (CME), 59–61

Joint Commission, 221, 223
Journal of Continuing Education for the Health Professions, 142

Kaiser Permanente CME conferences (2007), 76
Kirkpatrick's 4 levels of evaluation, 33, 163
Knowledge: constructivist, 163; education and information differences context of, 276–277; learning as creation of types of, 3; physician learning activities focus on, 8; potential of networks in facilitating, 192–193; PPCC impact on dyslipidemia patient care, 203–204; UK online validation of, 239–240. *See also* Learning
Knowledge-to-action: description of, 36; evaluating impact of continuing education course on, 32–36
KOALA (Computerized Obstetrics and Gynecology Automated Learning Analysis), 214

Learning: assessing outcomes throughout experience of, 10–11; CME conceptual framework for assessing, 2–13; communities of practice and situated, 181–182; cooperative, 162, 163; definition of, 3; distributing (e-learning and *in situ* learning), 161; e-CE interventions/RCTs evidence for online, 44–50; evaluating impact of continuing education course on, 32–36; experiential, 162, 163; Internet point of care (PoC) approach to, 39–42; learning from experience and reflective, 182; PBL (problem-based learning), 162; personal learning projects in self-directed, 91–96; planning activities for physician, 6–10; POC (point of care), 39–42, 210–215, 276; SDL (self-directed learning), 91–96, 269–274; social psychology and behavior theories on, 179; stages in physician learning episodes, 213; transformative, 163, 182; UK health-care professionals' experience with online, 235–241. *See also* Knowledge
Learning activities: developing online IPE, 164; face-to-face promotive interaction, 163; planning, 6–10
Learning activities planning: for using authentic settings for practice, 8–10; "backwards planning" approach to, 6–7; focusing on clinical problems and knowledge, 8; physician stages of learning accounted in, 6–8
Learning from experience, 182
Liaison Committee on Continuing Medical Education (LCCME), 197

MAINPORT: developed as self-directed learning tool, 92; discussion on value and future of, 95–96; study on use and results of, 92–95
Maintenance of Certification (MOC): evaluating point of care learning for, 209–215; physician competence and quality of care studies by, 221; SAPs (self-assessment programs) of, 190–191
Medical and Dental Council of Nigeria (MDCN), 255–257
Medical education: in Germany, 259–260, 261; knowledge gaps context of information vs., 276–277. *See also* Continuing medical education (CME)
Medical education and communication companies (MECCs): description of, 81–82; as second largest accredited CME provider, 82
Medical Education Group (Pfizer), 72
Medical Meetings magazine, 69
MEDLINE database, 45
MI-Plus study: discussion of findings, 249–252; hypotheses and methods used in, 247–248; implications of, 252–253; results of, 248–249; on Web-based CME participation, 246–247
Middlesex Hospital's Internet point of care (PoC), 40–42
Miller's competence pyramid, 3, 169
Monash Standing Committee on Ethics in Research (Australia), 53
Motor Accidents Authority of New South Wales, 125
Multidisciplinary obstetric stimulated emergency scenarios (MOSES): discussion on value and future of, 102–103; increasing patient safety concerns and, 98–99; origins and development of, 99–100; results of, 100–102

Nadeau, L., 28
National Board of Medical Examiners (NBME), 223
National Patient Safety Agency (NPSA), 103
National Postgraduate Medical College of Nigeria (NPMCN), 255
National Prescribing Service (NPS) [Australia], 54
National Universities Commission (NUC) [Nigeria], 255
Needs assessment, 11
Nigerian health care system: examining medical information impact on, 254–255; MDCN participation of workers from, 255–257; medical education and work force of, 255; recommendations to improve, 257–258
North American Association of Medical Education and Communications Companies (NAAMECC), 69
Nurses: CIME Study on CV prevention role of, 16–28; 360-degree evaluation of residents by, 105–110. *See also* Physicians

Objective structured clinical examination (OSCE), 170
Obstetrics patient safety: increasing concerns with, 98–99; MOSES course to promote, 99–103
Occupational therapists (OTs): Canadian regulation of, 111–112; findings on quality improvement and, 115–117; multisource feedback systems for assessing, 112–115
Online clinical-question portfolio, 209–215
Online CME courses: e-CE interventions/RCTs evidence for learning in, 44–50; Internet point of care (PoC), 39–42, 276; interprofessional health sciences education, 161–166; for pharmacists in Australia, 52–56; physician characteristics predicting participation in, 246–253; promoting free IPV (intimate partner violence), 135–140; UK health-care professionals' experience with, 235–241. *See also* Continuing medical education (CME)
Ontario Health Professions Legislation Review Group (OHPLRG), 111, 112

Patient outcomes: continuing interprofessional development to improve, 84–88; improved cardiovascular prevention for improved, 16–28. *See also* Quality of care
Patient safety: increasing concerns with obstetrics, 98–99; MOSES course used to promote, 99–103
Patients: assessing health status of, 11; CIME Study and participating, 18–19, 23–25; physician-pharmacist collaborative care for dyslipidemia, 201–207. *See also* Quality of care
PDSA (plan-do-study-act) cycles, 88
Peer review of CME: findings on, 244–245; methods and results of, 243–244; standards and guidelines for, 242–243
Personal learning projects (PLP): description of, 92; discussion on future use of, 95–96; examining samples of submitted, 92–93; findings on use of, 92–95
Pfizer Medical Education Group, 72
Pharmacists. *See* Community pharmacists (Australia)
Physical diagnosis: evaluating and assessing courses on, 77; initiative for improving teaching of, 77–78
Physician competence: assessing, 11, 12; CIPE surgical training to improve, 185–188; definition of, 221; Miller's pyramid of, 3, 169; need for assessment of, 220–232; six competencies framework on, 194, 222; *To Err is Human* report on, 220; typology of problems identified in, 221
Physician continuous learning outcomes: CME conceptual framework for assessing, 2–13; MOC (Maintenance of Certification) program to improve, 190–191, 209–215, 221; MoL (Maintenance of Licensure) program to improve, 2
Physician-pharmacists collaborative-care (PPCC): to improve dyslipidemia treatment, 201–202; TEAM study of benefits of, 202–207
Physicians: ACCME accreditation standards for, 2; characteristics of CIME Study, 22; characteristics predicting Web-based CME activity by, 246–253; CME perspectives of German ambulatory care, 259–267; drivers of CME for family, 63–67; dyslipidemia patients' collaborative care by pharmacists and, 201–207; improving continuous learning outcomes for, 3–13; influence of gender/status on behavior of Nigerian, 254–258; Interview Guide for Physician Assessment Study, 233–234; medical education of German, 259–260, 261; need for assessment of, 220–232; participation in French CME by

hospital, 127–131; planning learning activities for, 6–10; stages in learning episodes of, 213; typology of problems identified in, 221; U.S. Bureau of Labor Statistics on jobs held by, 82; value of commercially supported CME to, 69–70. *See also* Continuing medical education (CME); Nurses
POC (point of care) learning, 39–42, 210–215, 276
Point-of-Care Report, 216–219
POISE (Program for Outreach to Interprofessional Services and Education in Medically Underserved Areas), 158–160
Practical Guide to the Evaluation of Clinical Competence (Holmboe and Hawkins), 194–195
Practice Improvement Continuing Medical Education (PICME), 198, 199
PRECEDE-PROCEED model, 17
Problem-based learning (PBL), 162
Professionalism: current state of discourses on surgical, 185–186; guiding IPE development and implementation, 180–181

Quality of care: description of high-quality, 85–86; educational context for improving, 85; interprofessional education to improve, 85; learning in context for, 86–87; opportunities for improving, 87–88; relationship between interprofessional learning and, 85–86; study on OTs and improved, 111–117; *To Err is Human* report on, 220; as underlying aim of CME, 84. *See also* Patient outcomes; Patients

Randomized controlled trials (RCTs): discussion of study on, 49–50; findings of study on, 46–49; limitations of study on, 50; literature review of, 45; study on Internet-based/non-Internet based, 44–45
